## PROFESSIONAL EXPERIENCE

### Next Level Solutions | Solutions Engineer II

Springfield, MO | Nov 2020 – Nov 2025

- Developed and supported client and internal software solutions, with focus in the insurance industry.
- Collaborated with Business, Quality Assurance, User Experience, and Project Management team members to work in an Agile development cycle across various projects.
- Worked with design team to draft pages using Figma and Sketch.
- Co-tech lead on a small team working on client marketing website, leading initiative to upgrade site from .NET to Nuxt.js for improved SEO and WCAG site accessibility.
- Collaborated and communicated directly with clients to assess and determine solutions.
- Developed and supported internal tools for streamlining in-house workflows.
- Utilized a variety of technologies and programming languages including JavaScript, Angular, React, Vue, YAML, JSON, Firebase, SQL, XML, and .NET.
- Used git and TFS to manage codebase changes and facilitate collaboration, ensuring clean and maintainable code.
- Mentored and supported junior resources across departments.

### Marlin Network | Web Developer

Springfield, MO | Jul 2018 – Nov 2020

- Worked on a team of 8 developers, along with marketing and design teams to develop web solutions for big-name brands in the foodservice industry.
- Worked with design team utilizing Adobe XD, InDesign, and Sketch
- Utilized a variety of programming languages and technologies such as Vue, .NET, SQL Server, Twig, PHP, and Meteor to develop websites.
- Worked with various Content Management Systems such as Umbraco, Pimcore, WordPress, Strapi, Prismic, HubSpot, and Decap (Netlify).
- Developed marketing emails, ensuring they looked consistent across all email clients.
- Utilized git to manage codebase changes.
- Mentored and supported junior developers.

### Speckman Tutoring Center | Programming & Computing Tutor

Springfield, MO | Jan 2016 – May 2018

- Assisted students with classroom concepts in programming languages such as JavaScript, HTML/CSS, Java, SQL, and C#.
- Aided students with coursework in general computing and Microsoft Suite utilization.
- Worked with students to plan a roadmap for future success in courses.
